

Giro Di Lombok
18th – 22nd October 2017

Cycling Lombok is quite an experience! It's a small island, stretching from 80km from north to south as from east to west. It is known as the unspoiled Bali, as it is less developed. Along the route you will find beautiful beaches, mountain views, and untouched nature! In total you will cycle 3 days, with 2 days rest. The rest days will give you the opportunity to visit the other nearby exotic islands. The cycle roughly covers 50km - 80km per day. A dedicated car and support team will always be there during the trip so members of the group can take a break along the way.

This event is organized by BSF Indonesia, a foundation that aims to providing sporting opportunities to the disabled of all ages in Bali and East Indonesia. BSF works with 300 athletes and operates 16 different sports including wheelchair rugby, blind football and hand-cycling. This event is in support of BSF and is reflected in the package price.
